The arrangement of the people gave us clues as to their relationship, as did the background scenery. Asking your family members for help, or using dolls or other figures in your home, experiment with different poses to demonstrate relationships.</p> <p>For example, a mother may cuddle their child, but not their boss! A young child may sitting cross-legged looking up at a teacher while the teacher stands looking down at the child.</p>

Examples could be:</p> <ul style="list-style-type: none"> • Early life • Hobbies and interests • Awards and Achievements • Family • Career and work <p>Can you now include pictures/illustrations and a caption underneath to explain it?</p>	<p>Year 6 - Area of a triangle 3</p> <p>Instructional video: https://vimeo.com/507906973</p> <p>Question sheet: https://resources.whiterosemaths.com/wp-content/uploads/2020/01/Y6-Spring-Block-5-WO5-Area-of-a-triangle-3-2019.pdf</p> <p>Answer sheet: https://resources.whiterosemaths.com/wp-content/uploads/2020/01/Y6-Spring-Block-5-ANS5-Area-of-a-triangle-3-2019.pdf</p> <p>Challenge true or false? – Discuss https://resources.whiterosemaths.com/wp-content/uploads/2020/02/T-or-F-Year-6-Spring-B5-S5-Area-of-a-triangle-3.pdf</p>	<p>If you have an iPad/tablet/camera you can take photographs to model the different poses which will help you with your sketches. Once you are happy that your image/pose demonstrates the relationship of your characters, sketch the portrait. Begin with a bold outline then add the finer details to it.</p> <p>In particular, focus on adding clothing details and background details. Can you make any background details more subtle, like a clue someone could only pick up if they looked really carefully? Experiment with sketching portraits portraying different relationships, which is your favourite and why?</p>
